

**Australian Government**  
**Australian Pesticides and  
Veterinary Medicines Authority**

**PERMIT TO ALLOW MINOR USE OF A REGISTERED AGVET CHEMICAL  
PRODUCT FOR CONTROL OF GREY MOULD IN BLUEBERRIES**

**PERMIT NUMBER – PER86489**

This permit is issued to the Permit Holder in response to an application granted by the APVMA under section 112 of the Agvet Codes of the jurisdictions set out below. This permit allows a person, as stipulated below, to use the product in the manner specified in this permit in the designated jurisdictions. This permit also allows the Permit Holder and any person stipulated below to claim that the product can be used in the manner specified in this permit.

**THIS PERMIT IS IN FORCE FROM 25 JANUARY 2019 TO 31 JANUARY 2029**

**Permit Holder:**

HORTICULTURE INNOVATION AUSTRALIA LTD  
Level 7, 141 Walker Street  
NORTH SYDNEY NSW 2060

**Persons who can use the product under this permit:**

Persons generally.

## CONDITIONS OF USE

### Products to be used:

TELDOR 500 SC FUNGICIDE (APVMA No. 50670)

PLUS OTHER REGISTERED PRODUCTS

Containing: 500 g/L FENHEXAMID as the only active constituent.

### Directions for Use:

Crop	Disease	Rate
BLUEBERRIES  Field and Protected	Grey mould ( <i>Botrytis cinerea</i> )	100 mL product / 100 L

### Critical Use Comments:

- Reduce background levels of disease by removing plant debris and rotted fruit.
- Apply at first signs of infection or at white bud.
- Use a spray volume of 600 – 1000 L/ha, ensuring thorough coverage of all plant surfaces.
- Do NOT exceed a maximum of four (4) applications per crop per season with not more than two (2) applications sequentially before using another fungicide from a different MoA chemical group.
- Allow a minimum re-treatment interval of 7-10 days between consecutive applications.
- Apply using airblast, knapsack or equivalent equipment.

### Withholding Period:

Harvest: Do not harvest for 1 day after application.

### Jurisdiction:

All States and Territories, except VIC.

Note: Victoria is not included in this permit, as their Control-of-Use legislation means a permit is not required to legalise this off-label use in that State.

### Additional Conditions:

This permit allows for the use of a product in a manner specified on the permit. Persons who wish to prepare for use and/or use products for the purposes specified in this permit must read, or have read to them, the details and conditions of this permit. Unless otherwise stated, the use of the product must be in accordance with the product label.

The holder of the permit must notify the APVMA of new information, including relevant information in accordance with section 161 of the Schedule to the *Agricultural and Veterinary Chemicals Code Act 1994*, in accordance with the obligation imposed by that section.

### *Export of treated produce*

Temporary Maximum Residue Limits (TMRLs) have been established to allow treated produce to be used for human consumption. A TMRL has been established for Fenhexamid in Blueberries. MRLs can be found in the Agricultural and Veterinary Chemicals Code (MRL Standard) Instrument 2019. MRLs apply only to produce marketed and consumed in Australia. If treated produce is to be exported, residues must not exceed the limits/tolerances of the importing country.

Issued by the Australian Pesticides and Veterinary Medicines Authority

Note: 09/11/2023 – Permit updated to include S161 statement, export of treated product statement updated, and permit holder amended. Permit expiry extended to 31/01/2029. Permit issued as Version 2.
